A civil defense siren, also known as an air-raid siren or tornado siren, is a siren used to provide an emergency population warning to the general population of approaching danger. It is sometimes sounded again to indicate the danger has passed. [Wikipedia](#)

**a small manual siren on wheels. didn't ask why it was made but maxigas has used it in a demonstration in university to disrupt a meeting inside the building and it has worked**

---

**joubin** 6/22/23, 1:19 PM

So I finally wrote to the person responsible for supply of sirens, and I finally got an answer: (edited)

Hi Joubin

How are you? I'm doing fine, just returned from a holiday to Spain.

A great idea such a sound artwork, but not new. The idea of a sound artwork for the ending of the use of the sirens has already been coined up by another artist a couple of years ago. She has made a composition then but due to the continuation of the sirens up to now the project is not further pursued.

Also, the future of the sirens is still under consideration, a final decision on stopping is not yet made. I guess that there is a big chance that the sirens will continue (partly) for the years to come.

I'm afraid we will have to wait for the final outcome of the discussions on this.

Kind regards,

....
